PROFILE

Aspiring AI/ML Engineer and Python Developer with hands-on experience in data science, machine learning, and deep learning. Skilled in Python, pandas, NumPy, scikit-learn, TensorFlow, and Keras with a strong understanding of EDA, feature engineering, model training, evaluation, and deployment. Built real-world projects across healthcare, finance, and image recognition domains. Currently pursuing a BCA and actively seeking an AI/ML internship.

TECHNICAL SKILLS

Languages & Libraries: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, FastAPI

ML / AI Concepts: Supervised Learning, Regression (Linear/Logistic), Random Forest, Decision Trees, CNN, ANN, Neural Networks, Image Recognition

Data Skills: Data Cleaning, EDA, Feature Engineering, One-Hot Encoding, Train-Test Split, Model Evaluation (MAE, RMSE, R², Accuracy), Model Saving (joblib)

PROJECTS

RAG Chatbot (Retrieval-Augmented Generation)

- Built a Python-based Q&A chatbot using TF-IDF vectorization and cosine similarity for context retrieval.
- Developed a custom ML/AI Q&A dataset and integrated it as the knowledge base for accurate responses.
- Deployed with a Flask backend; resolved environment issues including scikit-learn version mismatches and entry-point conflicts.

House Price & Fraud Detection System

- End-to-end ML pipeline covering data cleaning, feature engineering, and model training using Linear/Logistic Regression and Random Forest. Evaluated with RMSE, MAE, and R² metrics.

Salary Prediction System

- Regression model built with scikit-learn to predict salaries based on experience and role features, with joblib-based model persistence for deployment.

Handwritten Digit Recognition

- Convolutional Neural Network (CNN) built with TensorFlow/Keras for MNIST digit classification. Achieved high accuracy using image preprocessing and data augmentation.

Student Marks Prediction

- Predictive model using multiple regression techniques to estimate student performance based on academic and demographic features.

User Interaction Analysis

- Exploratory data analysis and visualization using pandas, NumPy, Matplotlib, and Seaborn to uncover behavioral patterns from interaction datasets.

EDUCATION

Bachelor in Computer Application (BCA) Ongoing | Kantipur City College, Kathmandu

Computer Science (+2) 2077 – 2079 (B.S.) | Viswa Niketan, Tripureshwar

SOFT SKILLS

Attention to Detail · Strong Communication · Problem Solving · Teamwork
