---

## PROFILE

Aspiring AI/ML Engineer and Python Developer with hands-on experience in data science, machine learning, and deep learning. Skilled in Python, pandas, NumPy, scikit-learn, TensorFlow, and Keras with a strong understanding of EDA, feature engineering, model training, evaluation, and deployment. Built real-world projects across healthcare, finance, and image recognition domains. Currently pursuing a BCA and actively seeking an AI/ML internship.

## TECHNICAL SKILLS

**Languages & Libraries:** Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, FastAPI

**ML / AI Concepts:** Supervised Learning, Regression, Random Forest, Decision Trees, CNN, ANN, Neural Networks, Image Recognition, Natural Language Processing, Retrieval-Augmented Generation (RAG)

**RAG / NLP Skills:** Document Preprocessing, Knowledge-Base Creation, TF-IDF Vectorization, Cosine Similarity, Context Retrieval, Text Classification, Prompt Engineering

**Data Skills:** Data Cleaning, EDA, Feature Engineering, One-Hot Encoding, Train-Test Split, Model Evaluation (MAE, RMSE, R<sup>2</sup>, Accuracy), Model Saving and Loading with Joblib

## PROJECTS

### AI Reception (ANA — Artificial Neural Assistant)

- Contributed to developing a RAG-based Q&A; chatbot for generating context-aware responses.
- Worked on document preprocessing, knowledge-base preparation, and relevant information retrieval.
- Used vectorization and similarity search to retrieve suitable context for user queries.

### House Price & Fraud Detection System

- End-to-end ML pipeline covering data cleaning, feature engineering, and model training using Linear/Logistic Regression and Random Forest. Evaluated with RMSE, MAE, and R<sup>2</sup> metrics.

### Salary Prediction System

- Regression model built with scikit-learn to predict salaries based on experience and role features, with joblib-based model persistence for deployment.

### Handwritten Digit Recognition

- Convolutional Neural Network (CNN) built with TensorFlow/Keras for MNIST digit classification. Achieved high accuracy using image preprocessing and data augmentation.

### User Interaction Analysis

- Exploratory data analysis and visualization using pandas, NumPy, Matplotlib, and Seaborn to uncover behavioral patterns from interaction datasets.

## EDUCATION

### Bachelor in Computer Application (BCA)

Ongoing | Kantipur City College, Kathmandu

### Computer Science (+2)

2077 – 2079 (B.S.) | Viswa Niketan, Tripureshwor

## SOFT SKILLS

Attention to Detail · Strong Communication · Problem Solving · Teamwork
